MAISON AULNE

Preparing your project

GUIDE 02 / 2026

A practical guide for arriving at the first conversation with the right questions.

DEMONSTRATION - Fictional architecture, no real completed projects.

Before the plans, your daily life.

The place

Preferred area, identified land or a search in progress. Note access, views, available documents and points still to check.

The people

Who will live here now? What changes would you like to anticipate? Which moments are shared and which need privacy?

The priorities

Separate essential needs from wishes. Choose three priorities that will help guide decisions during design.

The images

Choose five references. Explain what you like about each: daylight, volume, material or relationship to the garden.

See the whole project.

Separate the items below and note whether each figure is confirmed, estimated or still open. This guide does not price construction or offer financing.

Land

Studies

Construction

Services and access

Landscaping

Fees and taxes

Contingency to establish

Your intended timing

Note actual constraints, preferred dates and stages still to confirm. The start date will depend on the project and necessary checks.

One page to begin.

Area and current project status

Three priorities
